EXAMINER'S AMENDMENT

An Examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

(I) With regard to page 11 (line 14), the phrase "protuberances 320-322" has been changed to the phrase -- protuberances 330-332 -- in order to remain consistent with the preceding specification language and drawing descriptions.

Reasons for Allowance

The following is an Examiner's statement of reasons for allowance:

The prior art of record fails to fairly, teach, show or suggest, by either anticipating or rendering obvious, the invention as set forth in the claims of the instant application.

Furthermore, an update of a search previously made does not detect the combined claimed elements as set forth in the pending claims. Additionally, the reasons for allowance of the claims over the prior art of record is believed to be clear from the prosecution history taken as a whole. More particularly, the instant invention (as set forth in independent claim 34) provides for a method of coupling a band to a disk, wherein the disk has a mass center and a rotational center. The band includes a plurality of protuberances. The disk is rotated to identify the mass center of the disk. The plurality of protuberances of the band is trimmed to establish a

new rotational center of the coupled disk and the band coincident with the mass center of the disk.

The closest prior art includes Landess et al. (US 6,226,146 B1) who discloses a band spacer for a stack of disks, wherein a plurality of protuberances (208) engage a disk spindle, on which the disk is mounted.

Landess et al. (US 6,226,146 B1), however, does not disclose a method wherein the mass center is matched to the rotational center of the disk by trimming the protuberances of the disk band spacer as set forth in the manner, function and relationship relative to other claimed structure and methods as prescribed by the independent claim 34.

Additionally, Landess et al. (US 6,226,146 B1) does not provide, alone or in combination with the art of record or general knowledge within the art, any suggestion or teaching for the invention as set forth in the independent claim 34.

Conclusion

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
